Save the Law.

It is said that an offort will be made in the Legislature to amend the pure elections law by inserting the word "corruptly" in all sections relating to the spending of money in elections.

If the act is thus to be amended, it might as well be repealed, for it will be meaningless, and money will be spent ad libitum. There are many politicians of many minds, and each and every poll-Ucian has his own idea as to what constitutes a "corrupt" expenditure of noney in elections. There are men of high standing in the State of Virginia who do not besitate to say that it is entirely proper and even patriotic to buy Their argument is that there is always a floating vote for sale, and that It is in the interest of good government that this vote shall be purchased and polled in the right way. There are others who take a more liberal view even than this, and say that all is fair in war and politics, and that a man has a perfect right to use money in elections in such a way as to promote his own candidacy In short, if the pure elections law be amended as suggested, each and every candidate will interpret it to suit himfelf, and we do not see how it will be possible to convict any man of a "corrupt" use of money. The law could be evaded, and would be evaded, and would be practically a dead letter.

One argument that has been used against the existing law is that it puts the honest man at a disadvantage. But in all conscience could not this argument be used with greater force against with the proposed amendment? Under the existing law the man who spends money in any way except as pro-vided subjects himself to indictment and prosecution, and if the law be rigidly enforced, if those who violate its pro visions are made to suffer for it, it will not be long before the law will be strictly observed. But if any intitude be allowed, the dishonest man will spend money with a free hand, and it will be next to impossible to catch up with him and con-

But grant that the honest man is placed at a disadvantage under the pure elections law, what are we going to do sbout it? The honest man is always at a disadvantage when he comes into competition with thieves. But is that a reason for repealing our laws against theft? What is to be our standard, honesty or the law and buy votes, are we to repeal the law and let all men buy votes? Are we to make vote-buying legitimate traffie in Virginia?

and sell their votes, are we to repe Jaw and encourage all men to sell their votes for a price?

God forbid. It is the business of our law-makers to set the standard high and encourage men to be as honest in elections as they should be in business. They should make the law as rigid as possible, and should make the penalty so severe that men will be afraid to

The present law is defective and should be perfected. But the law should be so amended as to strengthen, not to destroy

It is easy to be thankful for blessings. es we count blessings, but it is another thing to be thankful in adversity. This nation is not as prosperous as it was a year ago. There has been a "roadjustment of values," and some fortunes have been cut in two, while others have been swopt away. The factories are not as busy as they were, and some are predicting that we are in for a season of

hard times But shall we, as a nation, refuse to thanks on this day that has been et spart as a day of general thanksgiving? Shall we receive good and shall The Baittingre court that has appointed we not also receive evil? Shall we forget the fat years; shall we forget all and be ungrateful. because our rations its value, has secured the services not

have been cut down? Heaven knows we have enough in the present year to inspire our gratitude. We have abundant crops; we have good trade at home and thread; we have more luxuries than our forefathers dreamed of; we have better educational facilities; we have better church facilities; we have more charitable institutions; we have more of everything that makes life worth living than any generation that has preceded us. We have plenty at home and we are at peace with the world.

But may we not also be thankful for our adversity? It is an old saying tha few men can stand prosperity. equally true of nations, for nations are but collections of men. It is adversity that brings men to reflection, and it is reflection that brings men to repentance The Prodigal Son in the parable did not 'come in himself" until his money wa all gone, and he reduced to hog-food. Prosperity drove him mad, but adversity jerked him back into his senses.

Was not this nation in a fair way to go prosperity crazy a few years ago It would seem so, if we are to judge by the capitalization schemes of our cap tains of industry? As now appears the check came none too soon, and we may well be thankful that the country was upared a disastrous financial panic. The essons of adversity are not sweet, whatever the poets may say of them, but they re profitable if we learn them aright.

But our gratitude as a nation should go higher than material things, should be thankful for the progress we in morals and religion, and we should on this glad day set our national ideals higher and determine that we will strive for greater attainments during the coming year and for all time to come; so that year by year we shall on each recurring anniversary have more and more to be thankful for in all that goes to elevate a nation.

Rapid Transit.

Much interest has been manifested in all parts of the civilized world in the German electric line between Berlin and Zossen, over which the cars are run at the rate of 110 miles an hour. It is said that at that speed there is no more swaying or vibration of the car than is expe rienced on an American railroad train running sixty miles an hour. Americans will not fall behind Germany or any other country in the matter of rapid transit, and if the line proves to be a success it will not be many years before we shall have similar lines in the United

If we had such a line between Rich mond and Washington the distance could be covered in about one hour and a quar ter. If we had such a line between Richmond and Old Point, in the summer scason we could run down to the seashore and got into the water for a bath within one hour. If we had such a line between Richmond and Petersburg it would require only about fifteen minutes to make the trip between the two cities.

This is something of a startler even in this fast age. But if our forefathers had been told that we would be able to travel from Eschmond to Washington in three hours' fime they would have laughed the prophecy to scorn. There are still greater possibilities in rapid transit.

A Bad Example.

In answer to a correspondent, the New York Tribune says that it is not desirous of helping Mr. Chamberlain to convert Great Britain from free trade to protect tion. "But we do feel," it adds, "that it would be inconsistent and worse than ungracious to snarl at British statesmen who are anxious to test at home the merts of an economical system under which the United States has achieved industrial and commercial supremacy, and which we have always supported to the best of

That was a pleasant letter written by ex-President Cloveland commending the Jamestown Exposition. He says truly that a great nation cannot bring to mind its "small beginnings and its stupendous growth through such a celebration as the Jamestown Exposition contemplates without stirring in the hearts of its people their best patriotism."

We dare say Mr. Cleveland's interest, in this enterprise was awakened during his recent visit to Virginis when he was shooting ducks on the Chesapeake, and It is easy to be thoughtful when the when he is said to have unknowingly larder is full and the goose hangs high, violated the Virginia game laws.
